

 **Hosky Coin**

**Hosky Coin**

**PITCHDECK** 

**Hosky Coin** is an exciting and innovative memecoin, offering a unique and lively perspective. It's designed with a focus on swiftness, affordability, and advanced features. Hosky Coin stands unique with its commitment to an engaging and playful experience for its community.

Hosky Coin stands as the governance token of the Hosky Coin ecosystem, this unique token operates on the Binance Smart Chain Network, it cautiously takes its place as the first memecoin to embody both speed and affordability while incorporating smart contract capabilities.

The ethical appeal of Hosky Coin rolls around enjoyment, community building, and fostering a deeper understanding of the transformative era of cryptocurrency, Hosky Coin aligns itself with the BSC network to contribute to the creation of expansive ecosystems where cryptocurrencies can circulate freely, securely, and efficiently.

Some cool features Currently in development include:

1. The Hosky Coin metaverse, referred to as the "Hoskyverse," is set to be a comprehensive space including a full VR World,
2. The HoskySwap DApp: HoskySwap is an Automated Market Maker (AMM) Swap enriched with proprietary cross-chain bridges, staking, and lending functionalities.

Can find more on Hosky Coin Whitepaper.

Hosky Coin token holders will partake in seamless navigation and have access to exclusive benefits within the evolving Hoskyverse.

## **Hosky Coin**

## **Hosky Network**

**Hosky** tackles challenges faced by other DAG networks by introducing a unique "snapshot" mechanism, effectively preventing spam from malicious actors. Operating on a Directed Acyclic Graph (DAG) ledger structure, Hosky provides a network with low latency and high scalability. As the first public chain to integrate smart contracts into a DAG ledger framework, Hosky ensures quick and feeless transactions.

The main goal of the Hosky network is to enable decentralized connections between different blockchains. The innovative "snapshot" mechanism is a key element in maintaining consensus within Hosky's ledger. Nodes, known as Snapshot Block Producers (SBPs), play a crucial role in creating snapshot blocks. Users, or Hosky holders, actively engage by voting for SBPs. The top 100 SBPs with the highest votes earn the privilege of producing blocks and are rewarded with HOSKY tokens based on their block production volume.

## RoadMap

### Q1- Q4 2024

- Strategic Marketing Initiatives
- Metaverse
- Engaging Staking Programs
- Community Incentive Programs
- Hosky Coin Limited Edition NFTs
- Media Visibility Boost
- Strategic Partnerships
- Token Release Strategy
- Angel Round for Strategic
- Token Burn for scarcity and value enhancement
- listing on major DEX & CEX exchanges.
- Bridging To BSC & ETH
- Exchange Listing Pursuit
- Certik Audit for security Assurance
- Verified supply on leading platforms
- Branded Merchandise Launch
- Global Physical Campaigns
- Collaborations with Youtube Influencers
- Enhanced Online Presence
